How can so much fun get my child ready for school?

Most kindergarten classrooms have a set of blocks and space for building with them. Playing with blocks develops math and science skills, helping children learn about gravity, balance, shapes, and solving problems. Lettered blocks help kids learn the alphabet.

Try these at home!

- **Tumbledown Towers.** Stack blocks on top of one another to build a tower as tall as you are. Then knock it down!
- **Beyond Buildings.** Make a house, a car, a wall all around the room.
- **Raid the Toy Box.** Add toy people and cars to the blocks for more imaginative play.
- **Big Blocks, Little Blocks.** Compare the sizes of blocks.
- **Recycle** plastic containers, empty boxes, nesting cups, and scraps of smooth wood. You don't need expensive blocks to build a great tower!

Things to say:

- **"Wow, you found a block that was half the size of that big one!"** Describe what your child did.
- **"Do you think it will stay by itself; is it balanced?"**
Ask questions.
- **"You want to make a fire truck with the big blocks? Can you take turns with the blocks?"**
Encourage cooperative behavior.
- **"This is fun isn't it?!"** Have fun playing with your child.
- **"Here, you try!"** Show your child how to share.
